AN ORACLE CONSULTING ADVISORY OFFERING

PEOPLESOFT HEALTH CHECK AS A SERVICE

OVERVIEW

Our **PeopleSoft Health Check as a Service** is a structured, repeatable assessment designed to help Oracle Consulting customers quickly understand the current health, risk profile, and upgrade readiness of their PeopleSoft environments.

This service enables Oracle Consulting to offer a low-risk, high-value advisory engagement that accelerates implementations, stabilizations, upgrades, and modernization initiatives while reducing delivery risk and uncovering clear remediation paths.

PEOPLESOFT SCOPE

The Health Check can be delivered across the full PeopleSoft stack, including:

- PeopleSoft HCM
- PeopleSoft FSCM
- PeopleSoft Campus Solutions
- PeopleTools & Platform
  - Application Server, Web Server, Process Scheduler
  - Database, integrations, batch, and reporting
  - Security and environment strategy

Assessments are tailored by industry, regulatory needs, and Oracle delivery objectives.

VALUE OF THE PEOPLESOFT ASSESSMENT

- Rapid insight into technical debt, configuration gaps, and risk
- Clear inputs to support PUM upgrades, re-platforming, and remediation
- Implementation-ready artifacts aligned to Oracle delivery standards
- Reduced downstream surprises and improved project predictability
- A repeatable attach service that strengthens Oracle's advisory footprint

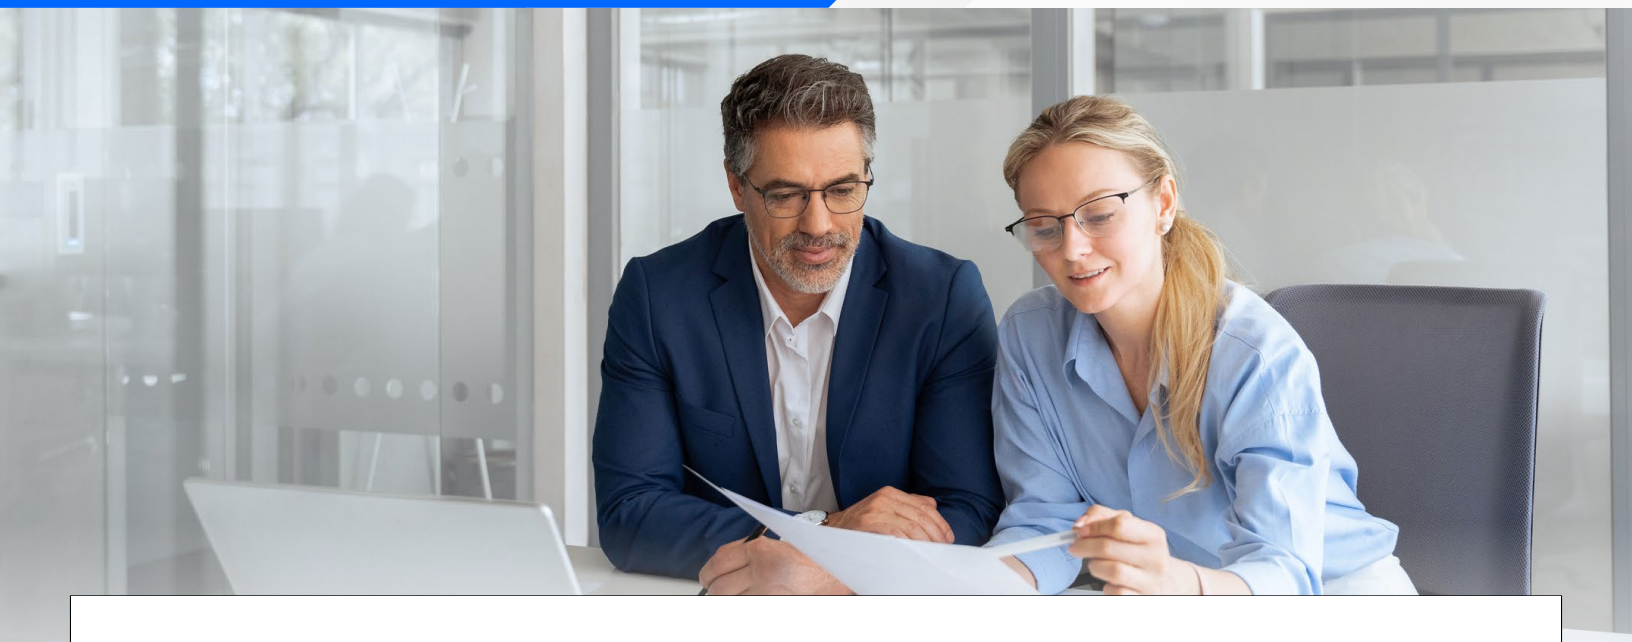

ASSESSMENT FOCUS AREAS

- Functional configuration alignment to business processes
- Customizations vs. delivered PeopleSoft functionality
- PeopleTools versioning, PUM currency, and upgrade readiness
- Batch, integration, and reporting performance
- Security model, roles, and Segregation of Duties (SoD) indicators
- Environment architecture and operational readiness

STANDARD HEALTH CHECK ARTIFACTS

Each engagement produces a consistent set of PeopleSoft-standard deliverables, including:

1. **Executive Health Summary:** Overall health rating, key risks, and recommendations
2. **Current-State Architecture Overview:** Logical environment and integration landscape
3. **Functional Configuration Assessment:** HCM, FSCM, and/or Campus Solutions findings
4. **Customization & Technical Debt Inventory:** Custom object analysis and upgrade impact
5. **PeopleTools & Platform Assessment:** Versioning, PUM compliance, and performance
6. **Security & Controls Review:** Role design, access risks, and audit observations
7. **Risk & Gap Register:** Prioritized issues with business and technical impact
8. **Remediation & Roadmap:** Short-, mid-, and long-term recommendations

OUR DELIVERY MODEL

- Time-boxed engagement (typically **3–4 weeks**)
- Interview-driven discovery combined with system analysis
- Minimal client disruption
- Oracle-aligned governance, terminology, and artifacts

BENEFITS OF PERFORMING A PEOPLESOFT ASSESSMENT

- Provides clear visibility into platform health, risk, and technical debt
- Identifies configuration gaps and customization impacts before they affect delivery
- Improves upgrade, PUM, and remediation planning accuracy
- Reduces project risk, cost overruns, and downstream surprises
- Strengthens security, controls, and audit readiness
- Enables data-driven decisions for modernization and long-term roadmap planning
- Establishes a common baseline for Oracle Consulting and customer alignment
